# Slimline Bifold Adjustable Rebate Adaptor

**Stellar slimline bifold doors are fitted with an adjustable lock stile rebate adaptor to enable on site adjustment of the lock and keep clearance / engagement.**

As shown alongside, there are four holes repeated at intervals along the rebate adaptor.

**A** has the locking screw fitted.

**B** has the adjusting screw fitted.

## TO INCREASE LOCK ENGAGEMENT INTO KEEP

- First, slightly loosen handle fixing screws.
- Loosen all locking screws A with a PZ2 screwdriver.
- Using a 3mm allen key, turn all adjusting screws B equally anti-clockwise (ensure that the 4.5mm max offset is not exceeded).
- Re-tighten locking screws and handle fixings.

## TO DECREASE LOCK ENGAGEMENT INTO KEEP

- First, slightly loosen handle fixing screws.
- Loosen all locking screws A with a PZ2 screwdriver.
- Using a 3mm allen key, turn all adjusting screws B equally clockwise (ensure that the 0.5mm min offset is not exceeded).
- Re-tighten locking screws and handle fixings.

**NOTE - ensure that roller cams are still engaging into keeps.**

The maximum and minimum adaptor/stile offset is shown below.
